Subject Index
Canadian Journal of Soil Science, Volume 89, 2009

A horizon
  variability in organic carbon stocks, 455
Abies balsamea
  harvesting and slash piling affects on soil, 343
Acid, organic
  properties of rhizosphere soils, 287
Acidity, soil
  soil microbiology in wood ash- or lime-amended soils, 169
Adaptive management
  development of soil disturbance standards in Ontario, 13
  science-based management of forest soil disturbance, 3
Aeration
  compaction on soil aeration and morphology, 45
Afrique de l'Ouest
  amelioration de la riziculture sur les ferralsols acides, 555
Aggregate turnover
  residue biomass and carbon and nitrogen in soil, 567
Air-filled porosity
  compaction on soil aeration and morphology, 45
Ammonia volatilization
  ammonia loss from surface-applied manure, 357
Analysis, soil
  Mehlich 3 extractable nutrients determined by NIRS, 579
  NIRS applications in soil analysis, 531
Anion competition
  effect of ions interactions on P transport, 179
Arsenic
  arsenic adsorption on mixed systems, 421

Balsam fir
  harvesting and slash piling affects on soil, 343
Biomass
  effluent effects on reed canarygrass and hybrid poplar, 223
  residue biomass and carbon and nitrogen in soil, 567
  soil microbiology in wood ash- or lime-amended soils, 169
Birnessite
  biomolecule-induced carbonate formation in abiotic humification, 445
Black spruce
  DOC and DON dynamics in black spruce ecosystems, 67
Black spruce peatlands
  rutting impacts on black spruce seedling performance, 57
Boreal forest
  theta probe calibration for duff, 315
Boreal forest soils
  compaction on soil aeration and morphology, 45
Bulk density
  camping effects on soil properties and pasture production, 235

C K-edge
  biomolecule-induced carbonate formation in abiotic humification, 445
Cadmium
  cadmium in potato tubers, 435
  trace elements in Ontario soils, 489
Calibration
  Mehlich 3 extractable nutrients determined by NIRS, 579
  NIRS applications in soil analysis, 531
  theta probe calibration for duff, 315
Carbon
  camping effects on soil properties and pasture production, 235
  management effects on light fraction composition, 281
  non labour et stockage de carbone dans le sol, 623
  residue biomass and carbon and nitrogen in soil, 567
Carbon dioxide
  harvesting and slash piling affects on soil, 343
  residue biomass and carbon and nitrogen in soil, 567
Carbon, dissolved organic
  DOC and DON dynamics in black spruce ecosystems, 67
Carbon fractionation, organic
  soil particles and organic matter, 413
Carbon mineralization
  soil microbiology in wood ash- or lime-amended soils, 169
Carbon:nitrogen ratio
  improving yields with supplementary N and papermill biosolids, 269
Carbon, soil organic
  genesis of Turbic Cryosols in Yukon Territory, 611
  soil biology in potato rotations, 391
  tillage effect on long-term no-till prairie soils, 521
  variability in organic carbon stocks, 455
Carbon sequestration
  variability in organic carbon stocks, 455
Cation
  effect of ions interactions on P transport, 179
  liming materials and soil properties, 209
Chemical extraction
  a tribute to Regis Simard, 133
Clay soil
  soil particles and organic matter, 413
Clearcut
  harvesting and slash piling affects on soil, 343
Climate change
  mycorrhizal networks, complex systems and climate change, 369
Compaction
  soil compaction on soil aeration and morphology, 45
  rehabilitation of forest landings, 25
  science-based management of forest soil disturbance, 3
Complex systems
  mycorrhizal networks, complex systems and climate change, 369

Compositional analysis
R.R. Simard's contribution to phosphorus issues, 145
Cone index
machine-specific forest soil trafficability, 93
Conservation, soil
rehabilitation of forest landings, 25
science-based management of forest soil disturbance, 3
Conservation systems
soil biology in potato rotations, 391
Constant-head well permeameter
indirect subsurface drip irrigation, 671
Corn
crop response to nitrogen fertilizer, 543
improving yields with supplementary N and papermill biosolids, 269
nutrient diagnosis of corn, 383
phosphorus fertilizer by-product, 189
Crop residue
management effects on light fraction composition, 281
Crop response
sulphur fertilizers for grass in humid areas, 511
Crop S uptake
sulphur fertilizers for grass in humid areas, 511
Cropping system
soil hydraulic quality factors, 645
Cryoturbation
genesis of Turbic Cryosols in Yukon Territory, 611

Degradation, soil
rehabilitation of forest landings, 25
Diffusive transport
effect of ions interactions on P transport, 179
effect of sulphate on phosphate solubility and movement, 589
Disturbance, soil
development of soil disturbance standards in Ontario, 13
machine-specific forest soil trafficability, 93

Drainage
managing excess water in Canadian prairie soils, 157
Drainage class
compaction on soil aeration and morphology, 45
Duff
theta probe calibration for duff, 315

Effluent irrigation
effluent effects on reed canarygrass and hybrid poplar, 223
winter wheat irrigated with pulp mill effluent, 657
Electrical conductivity
winter wheat irrigated with pulp mill effluent, 657
Enzymatic activity
liming materials and soil properties, 209

Ferrasol
usage de la couleur du sol en morphopedologie, 331
Ferrihydrite
arsenic adsorption on mixed systems, 421
Fertilité
usage de la couleur du sol en morphopedologie, 331
Fertility, soil
soil biology in potato rotations, 391
Fertilizer
crop response to nitrogen fertilizer, 543
phosphorus fertilizer by-product, 189
release of fertilizer S to soil, 501
sulphur fertilizers for grass in humid areas, 511
Fertilizer N recovery
rainfall and tillage effects on N recovery, 403
Field-saturated hydraulic conductivity
indirect subsurface drip irrigation, 671
Flux
ammonia loss from surface-applied manure, 357
Forest
assessment of soil treatment effects, 81
clearcut harvesting effects on soil and creek N, 35
harvesting and slash piling affects on soil, 343
machine-specific forest soil trafficability, 93
mycorrhizal networks, complex systems and climate change, 369
science-based management of forest soil disturbance, 3
Forest, boreal
theta probe calibration for duff, 315
Forest floor leachate
DOC and DON dynamics in black spruce ecosystems, 67
Forest harvesting
clearcut harvesting effects on soil and creek N, 35
DOC and DON dynamics in black spruce ecosystems, 67
machine-specific forest soil trafficability, 93
Forest soil rehabilitation
rehabilitation of forest landings, 25

Geostatistics
soil hydraulic and soil physical properties, 473
Grain corn
nutrient diagnosis of corn, 383
Grazing management
camping effects on soil properties and pasture production, 235
Greenhouse gas
harvesting and slash piling affects on soil, 343
Growing media
selected properties of baled sphagnum peat, 635
solute transport in sub-irrigated media, 301
Growth
assessment of soil treatment effects, 81
rutting impacts on black spruce seedling performance, 57
Gypsum
release of fertilizer S to soil, 501
winter wheat irrigated with pulp mill effluent, 657

Harvesting
clearcut harvesting effects on soil and creek N, 35
Harvesting response
DOC and DON dynamics in black spruce ecosystems, 67
Horticulture
selected properties of baled sphagnum peat, 635

Humic acid
arsenic adsorption on mixed systems, 421
Humification, abiotic
biomolecule-induced carbonate formation in abiotic humification, 445
Hydraulic quality
soil hydraulic and soil physical properties, 473
soil hydraulic quality factors, 645
Hydrolysable carbon
macroaggregate-associated physical chemical properties, 319
Hyperdystric Ferralsol
amelioration de la riziculture sur les ferralsols acides, 555

Infiltration
managing excess water in Canadian prairie soils, 157
solute transport in sub-irrigated media, 301
Integrated nutrient management
a tribute to Regis Simard, 133
Interspécifiques
amelioration de la riziculture sur les ferralsols acides, 555
Ion exchange membranes
a tribute to Regis Simard, 133
Irrigation
indirect subsurface drip irrigation, 671
Irrigation, effluent
effluent effects on reed canarygrass and hybrid poplar, 223
winter wheat irrigated with pulp mill effluent, 657

Kaolinite
arsenic adsorption on mixed systems, 421
Kd
trace elements in Ontario soils, 489
Kinetics
arsenic adsorption on mixed systems, 421

Leaching
clearcut harvesting effects on soil and creek N, 35
trace elements in Ontario soils, 489
Light fraction
C and N storage in soils in eastern Canada, 255
management effects on light fraction composition, 281
Lime
liming materials and soil properties, 209
Linear coregionalization model
soil hydraulic and soil physical properties, 473
Loam, fine sandy
soil biology in potato rotations, 391
Loss on ignition
soil mineral structural water loss, 603

Macroaggregate
macroaggregate-associated physical chemical properties, 319
Management practices, beneficial
managing excess water in Canadian prairie soils, 157
Manure, swine
ammonia loss from surface-applied manure, 357
Mass movement
genesis of Turbic Cryosols in Yukon Territory, 611
Mechanistic model
ammonia loss from surface-applied manure, 357
Mehlich 3
Mehlich 3 extractable nutrients determined by NIRS, 579
Metal
trace elements in Ontario soils, 489
Microbial biomass
soil microbiology in wood ash- or lime-amended soils, 169
Microsite assessment
rutting impacts on black spruce seedling performance, 57
Migration
mycorrhizal networks, complex systems and climate change, 369
Mineral
soil mineral structural water loss, 603
Mitigation
non labour et stockage de carbone dans le sol, 623
Mn L-edge NEXAFS
biomolecule-induced carbonate formation in abiotic humification, 445
Monitoring
science-based management of forest soil disturbance, 3
Montreal Process
science-based management of forest soil disturbance, 3
Morphology, soil
compaction on soil aeration and morphology, 45
Mycorrhizal networks
mycorrhizal networks, complex systems and climate change, 369

Natural resource management
science-based management of forest soil disturbance, 3
Near infrared reflectance spectroscopy
Mehlich 3 extractable nutrients determined by NIRS, 579
NIRS applications in soil analysis, 531
Nitrate
clearcut harvesting effects on soil and creek N, 35
Nitrogen
camping effects on soil properties and pasture production, 235
clearcut harvesting effects on soil and creek N, 35
crop response to nitrogen fertilizer, 543
management effects on light fraction composition, 281
Nitrogen cycling
improved N management in arable crops, 113
Nitrogen, dissolved organic
DOC and DON dynamics in black spruce ecosystems, 67
Nitrogen fertilizer
improved N management in arable crops, 113
improving yields with supplementary N and papermill biosolids, 269
Nitrogen level
residue biomass and carbon and nitrogen in soil, 567
Nitrogen mineralization
clearcut harvesting effects on soil and creek N, 35
Nitrogen/phosphorus fertilization
nutrient diagnosis of corn, 383
Nitrogen rate
crop response to nitrogen fertilizer, 543
Nitrogen, remobilized
rainfall and tillage effects on N recovery, 403

Nitrogen test, soil
improved N management in arable crops, 113
Nitrogen uptake
rainfall and tillage effects on N recovery, 403
No-till
C and N storage in soils in eastern Canada, 255
macroaggregate-associated physical chemical properties, 319
tillage effect on long-term no-till prairie soils, 521
Nutrient balance
nutrient diagnosis of corn, 383
Nutrient concentration
effluent effects on reed canarygrass and hybrid poplar, 223
Nutrient management, integrated
a tribute to Regis Simard, 133
Nutrient stratification
tillage effect on long-term no-till prairie soils, 521
Nutrient uptake modeling
nutrient uptake of hybrid poplar, 197

Organic acids
properties of rhizosphere soils, 287
Organic carbon fractionation
soil particles and organic matter, 413
Organic matter
C and N storage in soils in eastern Canada, 255

Papermill biosolids
improving yields with supplementary N and papermill biosolids, 269
Papermill sludge
a tribute to Regis Simard, 133
Particle size distribution
soil particles and organic matter, 413
Particle size
selected properties of baled sphagnum peat, 635
Partition coefficient
trace elements in Ontario soils, 489
Pathogens, soil-borne
soil biology in potato rotations, 391
Peat
rutting impacts on black spruce seedling performance, 57
selected properties of baled sphagnum peat, 635
solute transport in sub-irrigated media, 301
Pedotransfer function
estimating soil water retention curve, 461
soil hydraulic and soil physical properties, 473
Penetration resistance, soil
machine-specific forest soil trafficability, 93
Permanent soil factors
assessment of soil treatment effects, 81
pH, soil
liming materials and soil properties, 209
Phosphate
amelioration de la riziculture sur les ferralsols acides, 555
effect of sulphate on phosphate solubility and movement, 589
Phosphorus
cadmium in potato tubers, 435
camping effects on soil properties and pasture production, 235
phosphorus fertilizer by-product, 189
soil test phosphorus, 145
Phosphorus budget
R.R. Simard's contribution to phosphorus issues, 145
Phosphorus fractionation
R.R. Simard's contribution to phosphorus issues, 145
Physically protected organic matter
C and N storage in soils in eastern Canada, 255
Picea marinara
harvesting and slash piling affects on soil, 343
Plant N tests
improved N management in arable crops, 113
Polyphenol-Maillard reaction
biomolecule-induced carbonate formation in abiotic humification, 445
Poplar, hybrid
effluent effects on reed canarygrass and hybrid poplar, 223
nutrient uptake of hybrid poplar, 197
Porous media moisture
theta probe calibration for duff, 315
Porosity, air-filled
compaction on soil aeration and morphology, 45
Potassium, 133
Potato
cadmium in potato tubers, 435
soil biology in potato rotations, 391
Prairie
managing excess water in Canadian prairie soils, 157
Precipitation
effect of ions interactions on P transport, 179
Prediction
crop response to nitrogen fertilizer, 543
Principal component analysis
soil hydraulic and soil physical properties, 473
Productivity, soil
rehabilitation of forest landings, 25
Profile, soil
variability in organic carbon stocks, 455

Rainfall
rainfall and tillage effects on N recovery, 403
Redox potential
compaction on soil aeration and morphology, 45
Reed canarygrass
effluent effects on reed canarygrass and hybrid poplar, 223
Rehabilitation
rehabilitation of forest landings, 25
Resin
effect of ions interactions on P transport, 179
effect of sulphate on phosphate solubility and movement, 589
Response function
crop response to nitrogen fertilizer, 543
Rhizosphere
properties of rhizosphere soils, 287
Rhodochrosite
biomolecule-induced carbonate formation in abiotic humification, 445
Rice-wheat cropping
residue biomass and carbon and nitrogen in soil, 567

Riziculture pluviale
amelioration de la riziculture sur les ferralsols acides, 555
Root exudate
properties of rhizosphere soils, 287
Rut depth,
machine-specific forest soil trafficability, 93
Rutting severity
rutting impacts on black spruce seedling performance, 57

Science/policy linkages
development of soil disturbance standards in Ontario, 13
Semis direct
non labour et stockage de carbone dans le sol, 623
Sensitivity analysis
nutrient uptake of hybrid poplar, 197
Séquestration
non labour et stockage de carbone dans le sol, 623
Silviculture
assessment of soil treatment effects, 81
Simard, Régis
Régis Simard symposium, 111
Simplex closure
nutrient diagnosis of corn, 383
Site preparation
assessment of soil treatment effects, 81
Site quality index
assessment of soil treatment effects, 81
Sludge
improving yields with supplementary N and papermill biosolids, 269
papermill sludge, 133
phosphorus fertilizer by-product, 189
Sodium adsorption ratio
winter wheat irrigated with pulp mill effluent, 657
Solubility
effect of ions interactions on P transport, 179
effect of sulphate on phosphate solubility and movement, 589
Solute transport
solute transport in sub-irrigated media, 301
Sonication
soil particles and organic matter, 413
Soybean
improving yields with supplementary N and papermill biosolids, 269
phosphorus fertilizer by-product, 189
Spatial relationship
soil hydraulic and soil physical properties, 473
Spatial variability
variability in organic carbon stocks, 455
Spruce, black
DOC and DON dynamics in black spruce ecosystems, 67
Spruce, black, peatlands
rutting impacts on black spruce seedling performance, 57
SSAND model
nutrient uptake of hybrid poplar, 197
Steady-state
indirect subsurface drip irrigation, 671
Stockage de carbone
non labour et stockage de carbone dans le sol, 623
Straw
management effects on light fraction composition, 281
residue biomass and carbon and nitrogen in soil, 567
Stream N
clearcut harvesting effects on soil and creek N, 35
Structural water
soil mineral structural water loss, 603
Sub-irrigation
solute transport in sub-irrigated media, 301
Sulphate
effect of sulphate on phosphate solubility and movement, 589
sulphur fertilizers for grass in humid areas, 511
Sulphate, extractable inorganic
release of fertilizer S to soil, 501
Sulphur, elemental
release of fertilizer S to soil, 501
sulphur fertilizers for grass in humid areas, 511
Sulphur fertilizers
release of fertilizer S to soil, 501
sulphur fertilizers for grass in humid areas, 511
Sulphur, granulated
release of fertilizer S to soil, 501
Survival
rutting impacts on black spruce seedling performance, 57
Swine manure
ammonia loss from surface-applied manure, 357

Techniques de culture sans labour
non labour et stockage de carbone dans le sol, 623
Teinte
usage de la couleur du sol en morphopedologie, 331
Texture
assessment of soil treatment effects, 81
C and N storage in soils in eastern Canada, 255
estimating soil water retention curve, 461
Theta probe
theta probe calibration for duff, 315
Tillage
C and N storage in soils in eastern Canada, 255
rainfall and tillage effects on N recovery, 403
tillage effect on long-term no-till prairie soils, 521
management effects on light fraction composition, 281
Trafficability, soil
machine-specific forest soil trafficability, 93
Travail superficiel
non labour et stockage de carbone dans le sol, 623
Trees,
a century of planting trees, 247
Turbic Cryosol
genesis of, in the Yukon Territory, 611

Ultrasound energy
soil particles and organic matter, 413
Urea, ^{15}N-labelled
rainfall and tillage effects on N recovery, 403
Utilisation des sols
usage de la couleur du sol en morphopedologie, 331

Variance-covariance matrix
nutrient diagnosis of corn, 383

Water
  estimating soil water retention curve, 461
  soil hydraulic quality factors, 645
  soil mineral structural water loss, 603
Waterlogging
  managing excess water in Canadian prairie soils, 157
Weed
  nutrient uptake of hybrid poplar, 197
Wet sieving
  selected properties of baled sphagnum peat, 635
Wind tunnel
  ammonia loss from surface-applied manure, 357
Wood ash
  winter wheat irrigated with pulp mill effluent, 657

Yukon Territory
  genesis of Turbic Cryosols in Yukon Territory, 611

Zinc
  phosphorus fertilizer by-product, 189
